

Major Web Application Project - Codebase Map Template

Fill this in and submit it with your project as your Codebase Map (PDF). The narrative sections should fit on about 1 page; the feature table below does NOT count toward that page limit.

Name and Student Number:

Linh Nguyen – s5452023

Summary

App purpose (one sentence - “This app helps [who] to [do what]”):

This app helps users participate in online communities by creating posts, commenting on discussions, and voting on content.

Target grade and resulting Complexity total (core points earned + features claimed):

Target grade: High Distinction (HD). Complexity total: 1.00 — 0.60 from all five core requirements + 0.49 from features 6–14 = 1.09, capped at 1.00.

Proudest code

The one feature you most want to be examined on (and where it lives):

Asynchronous post voting using JavaScript fetch() and Laravel’s many-to-many vote relationship

- app/Http/Controllers/VoteController.php
- resources/js/app.js

AI log

Where AI helped you most, and one concrete instance where AI produced a bug or bad architecture that you found and fixed:

AI helped me most with generating and refining Laravel code and suggesting common implementation patterns. AI initially generated restrictive MIME-type and upload-count rules based on common image-upload patterns. That architecture did not match Forumly’s general-purpose attachment feature. I identified the mismatch and replaced those restrictions with Laravel’s file validation and a deliberate 10 MB per-file limit. I also stored the detected MIME type, original filename, size, and storage path as metadata so different attachment types could be displayed and downloaded consistently.

Feature table

Indicate the completion status of each requirement and give the location (file @ lines), and calculate the total score for each table.

#	Core Requirement	Location (file @ lines)	Status
1	Authentication + username on every page	• routes/auth.php @ 14–59 • resources/views/layouts/navigation.blade.php @ 29–136 • resources/views/layouts/app.blade.php @ 20–21	Complete
2	3+ related domain tables	• app/Models/User.php @ 16–56 • app/Models/Post.php @ 14–52 • app/Models/Community.php @ 9–22	Complete
3	Full CRUD on a main resource	• app/Http/Controllers/PostController.php @ 18–247	Complete
4	Server-side validation	• app/Http/Controllers/PostController.php @ 91–99, 174–186 • CommentController.php @ 12–16 • CommunityController.php @ 37–49, 93–106	Complete
5	Ownership authorization	• app/Policies/PostPolicy.php @ 8–65 • app/Http/Controllers/PostController.php @ 163–165, 174–176, 234–238	Complete
Total Score Complete = 0.12 Partial = 0.06 Absent = 0			0.6

#	Feature	Location (file @ lines)	Status	Score
6	Image / file upload	• app/Http/Controllers/PostController.php @ 91–134, 174–229, 249–259 • resources/views/components/post-card.blade.php @ 73–103	Complete	+0.05
7	Pagination combined with search / filtering	• app/Http/Controllers/PostController.php @ 18–76	Complete	+0.05
8	Coherent & usable app	• resources/views/layouts/app.blade.php @ 1–42 • resources/views/layouts/navigation.blade.php @ 1–139 • resources/views/components/post-card.blade.php @ 1–119	Complete	+0.05
9	4th related table	• app/Models/Comment.php @ 11–29 • app/Http/Controllers/CommentController.php @ 11–30 • app/Http/Controllers/PostController.php @ 141–145	Complete	+0.03
10	5th related	• app/Models/Vote.php @ 10–21	Complete	+0.03

	table	• app/Http/Controllers/VoteController.php @ 11–21		
11	Many-to-many via a pivot table	• app/Models/User.php @ 46–50 • app/Models/Post.php @ 48–52 • app/Models/Vote.php @ 10–21 • app/Http/Controllers/VoteController.php @ 11–21	Complete	+0.07
12	Roles + middleware	• app/Http/Middleware/AdminMiddleware.php @ 9–25 • bootstrap/app.php @ 15–19 • routes/web.php @ 60–72	Complete	+0.07
13	Asynchronous UI (AJAX/Livewire)	• resources/js/app.js @ 61–91 • app/Http/Controllers/VoteController.php @ 11–21	Complete	+0.07
14	3+ passing automated feature tests	• tests/Feature/PostTest.php @ 11–107 • tests/Feature/AdminTest.php @ 10–88 • tests/Feature/VoteTest.php @ 10–67 • tests/Feature/AttachmentTest.php @ 13–110	Complete	+0.07
15	Third-party API		absent	+0.00
Total score			0.49
